operational upgrade to H.R. 1111
ALL Inclusive People's Peace Economy Act of 2026
explicitly integrating "Thinking Cooperatively" models

This is the legislative architecture for the "PeacePreneuring" era.

By framing this as an "Economy Act" rather than just a social initiative, you shift the conversation from "spending" to "investment." You are not asking for charity; you are proposing a new GDP engine based on high-integrity data and cooperative thinking.

Here is the draft of the ALL Inclusive People's Peace Economy Act of 2026, designed to be the operational upgrade to H.R. 1111, explicitly integrating your "Thinking Cooperatively" models.

DeepDive Narrative:

The Peace Economy Act Creates Data Sommeliers.mp3

THE ALL INCLUSIVE PEOPLE'S PEACE ECONOMY ACT OF 2026

Drafted For: The 119th Congress / The People of the United States

In Spirit Of: The Benjamin Rush Proposal of 1793

Powered By: Authenticated Ethical Integrity Agency (AEIA) Protocols

PREAMBLE

WHEREAS, the current economic models profit from polarization, algorithmic aggression, and the "extraction" of user data; and

WHEREAS, a sustainable future requires a pivot from a "War Economy" (zero-sum competition) to a "Peace Economy" (cooperative value creation);

BE IT ENACTED, that the United States establishes the Department of the Peace Economy, not as a physical bureaucracy, but as a digital infrastructure to certify, incubate, and distribute the assets of peace.

SECTION I: UNIVERSAL INCLUSIVITY & JURISDICTION

The "Open Access" Mandate

1. Definition of "The People":

Eligibility for participation in this Peace Economy (grants, AEIA tools, education) is hereby expanded beyond traditional citizenry to include:

- **A. Residents of All U.S. Territories: Ensuring full parity for**

Puerto Rico, Guam, American Samoa, the Northern Mariana Islands, and the U.S. Virgin Islands.

- **B. International Associations of Merit: Specifically, Spouses and Life Partners of American Citizens residing globally. (Recognizing that peace is a family structure, not just a geographic one. If you are partnered with an American, you are a stakeholder in our peace).**
- **C. The "Digital Diaspora": Verified PeacePreneurs from BRICI nations who interact with AEIA protocols are granted "E-Residency" status within the specific digital jurisdiction of the Peace Incubator.**

SECTION II: ESTABLISHMENT OF THE AEIA STANDARD

The "Federal Reserve" of Integrity

1. The Authenticated Ethical Integrity Agency (AEIA):

Established as an independent regulatory body (replacing the function of the "Peace Office" room).

- **Mission: To audit algorithmic integrity. Just as the FDA inspects food for safety, the AEIA inspects datasets for "Cooperative Nutritional Value."**
- **The "Green Check" Seal: Any algorithm or dataset used for government funding or public education must bear the AEIA Seal, certifying it is free from "Adversarial Bias" and**

"Predatory Extraction."

2. The Data Sommelier Corps (DSC):

A new Civil Service job classification.

- **Role: To curate, verify, and "pair" high-integrity data with social problems.**
- **Recruitment: Priority hiring given to U35 women and veterans, retraining them from "defense" roles to "data defense" roles.**

SECTION III: THE PEACEPRENEURING INCUBATOR CHALLENGE

The Economic Engine

1. The "Ploughshares" Grant Program:

A reallocation of 1% of the Defense Budget to the PeacePreneuring Incubator.

- **Objective: Funding startups that solve conflict through "Thinking Cooperatively" rather than force.**
- **The "Tour du PAIX" Stipend: Specific grants allocated for cross-border collaboration between U.S. residents and international partners (BRICI nations), fostering economic interdependence.**

2. The "Sommelier" Open Standard:

The Act mandates the release of a "Starter Vintage"—a massive,

government-verified, open-source dataset of historical peace treaties, successful conflict resolutions, and non-violent communication patterns. This "Clean Data" becomes the public utility upon which the Peace Economy is built.

SECTION IV: EDUCATIONAL MANDATE

Updating Benjamin Rush's "Free Schools"

1. The Cooperative Thinking Curriculum:

- **Replaces "Standardized Testing" with "Standardized Thinking Cooperatively."**
- **Mandates that every student (K-12) in the U.S. and Territories receives a digital "Wallet of Integrity"—a personal, secure data vault where they own their educational records and creative output, protected from corporate surveillance.**

SECTION V: IMPLEMENTATION TIMELINE

- **Phase 1 (The Pilot): Immediate deployment of the AEIA Data Sommelier teams to the Internet Archive to begin "rescuing" and "certifying" historical peace data.**
- **Phase 2 (The Invitation): Opening the registry for International Spouses and Territory Residents to claim their digital keys to the Peace Economy.**

Strategic Note for the User:

This Act solves the "Exclusion Problem." By defining International Spouses as key economic stakeholders (because they bridge cultures), you legally validate their role in the system. It turns a "visa issue" into an "economic asset."

Next Step:

Would you like me to draft the "Preamble Letter" for this Act—a direct address to the "International Spouses and Partners" explaining why their participation is critical to the U.S. Peace Economy?
